

BO 200 FORCE

Protective bollards with extreme impact resistance

MORE INFO ▶

BO 200 FORCE

Protective bollards with extreme impact resistance

Due to its strength and impact-resistant flexibility, the BO 200 FORCE is the most effective solution when it comes to protecting gates, access ways, corners and machines from impacts up to 16.000 Joule. The deformation that occurs after each crash will disappear once the vehicle draws back. This eliminates the need for post-impact repairs.

For the BO 200 FORCE, Boplan® developed a new, improved and patented polymer that can handle those extreme impact values.

OPTIONAL BASE SHIELD
(see accessories)

A REVOLUTIONARY BASEPLATE

The screws that anchor the round baseplate to the floor are protected by the Base Defender. This rubber cover makes it physically impossible to drive over the baseplate and damage the screws. For a more finished look, cover the Base Defender with a Base Shield (optional).

This also provides additional protection from ground-level impacts and hygienic protection from dirt and dust.

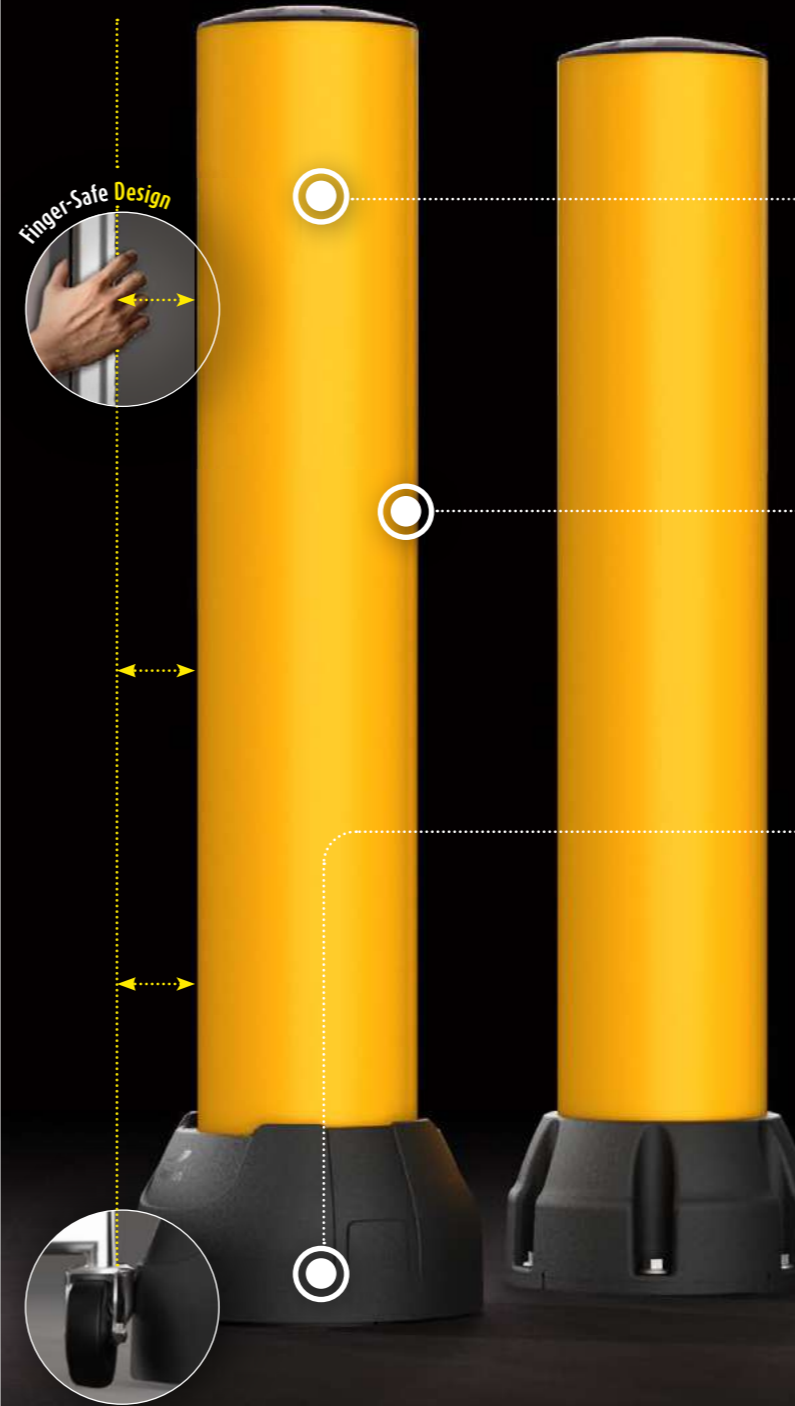

AVAILABLE IN 3 HEIGHTS

- ▶ 750 mm
- ▶ 1000 mm
- ▶ 1200 mm

MAXIMUM VISIBILITY

The BO 200 FORCE posts come in a variety of distinctive colors and patterns, making them highly visible in any situation.

- ▶ Yellow or Black (standard)
- ▶ Optional striping:
 - 1, 2 or 3 stripes
 - yellow, black or white striping

ACCESSORIES

Boplan® SignMark 200

Convey the right message in the right place with the optional SignMark 200: one-way traffic, speed limits, mandatory safety equipment, special warnings, etc. The SignMark 200 is designed for a perfect fit on the BO 200 FORCE and can easily be replaced with a single click.

Rotor Sleeve

When a vehicle collides with a BO 200 FORCE, the Rotor Sleeve deflects the impact by rotating. This means that the bollard does not absorb the full force of the collision, reducing damage to your vehicle. This is beneficial in areas with an increased risk of collision, such as high traffic areas.

Base Shield

The Base Shield protects the Base Defender and the baseplate from ground-level impacts and provides hygienic protection from dirt and dust. And on top of that... it looks great.

ADVANTAGES

- ▶ Optimized Novilene® polymer formula for extreme impact resistance up to 16.000 Joules
- ▶ Tested with TÜV certification
- ▶ Protected baseplate mounts
- ▶ Finger-safe design
- ▶ Sustainable design: easy to (dis-)assemble
- ▶ Patented technology
- ▶ Choice of options, colors and heights

APPLICATIONS / TYPICAL ENVIRONMENTS

- ▶ Protection of gates, access ways, corners and machines
- ▶ Car park buildings
- ▶ Commercial real estate
- ▶ Distribution centers
- ▶ Industrial real estate
- ▶ Logistics, supply chain and material handling industries
- ▶ (Petro-)chemical plants
- ▶ Transport and logistics centers
- ▶ Warehouses and storage facilities
