# BOPLAN

The Ultimate Safety Materials Manufacturer

Boplan designs, develops and manufactures durable and extremely effective safety barriers for demanding environments. The focus is on the protection of people, vehicles, buildings and infrastructure. We only use high-quality and extremely strong plastics, so the features of traditional raw materials become meaningless.

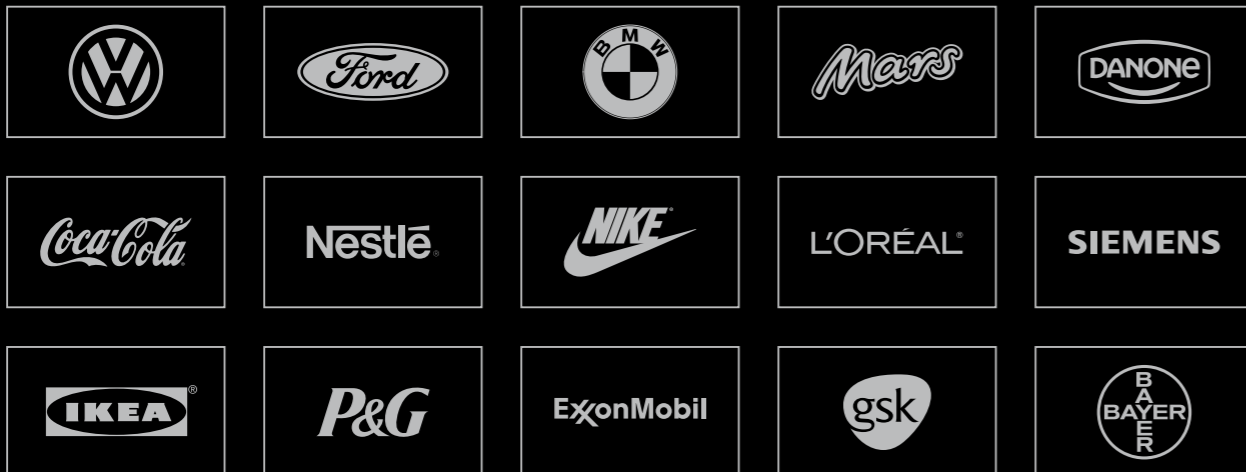

Boplan modular systems are the most innovative available on the market and are used to secure industrial buildings, warehouses, production halls, airports, drilling platforms and (petro)chemical sites. We offer a solution for any specific application.

Thanks to our passion for quality and sense of innovation, we have become one of the sector's leading companies. All products and systems are tested in advance to meet the highest standards.

### OUR MISSION:

Boplan is committed to create extraordinary products and challenge existing standards in industrial safety! We do this through our talented and dedicated team, a constant drive for innovation, and a passion for exceeding our customer's expectations.

### SOME OF OUR CUSTOMERS:

# FLEX IMPACT

The original polymer barrier system

FLEX IMPACT has been specially developed to create a safe (working) environment in an economical manner. To ensure perfect protection of people, machinery, tools, goods, buildings and infrastructure in places where forklift trucks, carriages or other vehicles are used. After all, machine downtime or repairs after collision still result in excessive and unreasonable costs. Moreover, there are also the adverse effects in the event of human injury. Therefore, the FLEX IMPACT system has been tested extensively to comply with the strictest safety standards. FLEX IMPACT has been developed totally modularly so the separate elements can be easily positioned and, if required, replaced. This is a cost-saving factor that must be highly valued.

Registered models, patents and patents pending. The colours in the brochure can differ from product to product and may not reflect the colour of the actual products. Colours in this brochure are non-binding and may vary by application, market and production cycle.

### ▶ RACK PROTECTORS

Perfect protection for racks

Collisions with warehouse racks can have far-reaching consequences. They almost always result in extremely high material costs when the racks collapse, often made worse by an uncontrollable domino effect. Moreover, this almost always leads to life-threatening situations for the forklift truck driver or for other people in the building. Such disaster scenarios can now easily be prevented by installing our FLEX IMPACT Rack Protectors.

### ▶ COLUMN & CORNER PROTECTORS

The best protection for supporting posts and columns

Supporting posts and columns in industrial buildings should be protected perfectly. After all, in the long term, collisions can endanger the stability of the entire construction. Our Column Protectors consist of two parts, which are simply attached closely around the post. They have high compressive strength, so any shocks are perfectly absorbed and the post is spared any structural damage. Smaller, non-supporting columns can be protected with our Corner Protectors.

### ▶ SAFETY GATES

Innovative entrance gates

Gates that are carelessly left open can seriously affect safety. Our Safety Gates range eliminates these risks thanks to self-closing sliding and swinging gates with accompanying parapets. This results in smooth and safer traffic between the various areas in your company.

▶ Goal Post / industrial door protection

▶ Rack End / rack protection

▶ TB Triple Super / machine protection

▶ TB 400 / conveyor belt protection

▶ TB Plus / fire equipment protection

▶ KP Universal - KP 150 / column protection

▶ TB Plus - SG Swing / walkway protection

▶ BO Impact / industrial door protection
